Re: SC-5J

Attn: Grace Co,

Per our phone call Friday May 9th, 2014 I am writing to respond to your questions about WVP Acquisition Corp. WVP was closed in 2010 and our manager of this operation has since retired. Earlier mailings from your department were going into the WVP mailbox and this mailbox was not checked regularly. I have reviewed your questions and have the below answers for you.

1. WVP rented the WVP building between December 2001 and December 2010.
2. (No). We formed hard plastic with the use of electric heating during our rental period. The plastic was hard not liquid when we received it from vendors outside the boundaries of the site.
3. WVP had no past or present solid waste management units.
4. WVP had no leaks, spills, or releases.
5. WVP did not need any permits and WVP did not have any.
6. WVP has no knowledge to offer for this question.
7. WVP had heard that the area was considered groundwater contaminated by our bankers when we were once interested in purchasing the property. Once we found this out we stopped our pursuit of a mortgage and purchase of the property. We continue to rent the property until closing the operation in December 2010 due to the extreme recession.

If you should have any questions please contact me.
